Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface for profile management, networking recommendations, and AI-generated messages.	HTML, CSS, JavaScript
API Gateway	Receives user requests and forwards them to the backend services.	Flask REST API
Microservices	Handles authentication, AI recommendation generation, message generation, and communication with Google Cloud Generative AI.	Python, Flask, Google Gemini API
Database	Stores user profiles, preferences, networking history, and AI-generated recommendations.	Firebase Firestore
