Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Consistent indentation followed in all source files.
2	Proper File Structure	Files and folders are logically organized	Yes	Project organized into frontend, backend, and configuration folders.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Variables are named according to their functionality.
4	Function / Method Names	Functions are descriptively named	Yes	Functions clearly indicate their purpose.
5	Code Comments	Inline and block comments explain logic	Yes	Important sections are documented with comments.
6	Modular Design	Code is split into reusable functions/modules	Yes	Authentication, recommendation, and message generation are implemented as separate modules.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Repeated code is minimized through reusable functions.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Basic input validation and exception handling are implemented.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	User Authentication Module	Python, Flask	Login and Registration	High
2	Profile Management Module	Python, Flask	User Profile Operations	High
3	AI Recommendation Engine	Google Gemini API, Python	Networking Recommendation Generation	High
4	AI Message Generator	Google Gemini API	Connection Request & Conversation Starter Generation	High
5	Firebase Database Module	Firebase Firestore	User Profiles, Recommendations, Networking History	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized project structure with separate modules.
Readability	5	Clear naming conventions and consistent formatting.
Reusability	5	Multiple reusable modules reduce code duplication.
Documentation / Comments	4	Major logic is documented with comments.
Overall Score	5	Clean, maintainable, and reusable codebase following good coding practices.
