

Scalability & Future Plan

Date	3 July 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports a limited number of concurrent users in the current local deployment.	Reduced performance under high user load.	High
2	Uses a basic local database suitable for development only.	Uses a basic local database suitable for development only.	Medium
3	Basic authentication and security features.	Additional security measures are needed for production deployment.	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Suitable for small-scale usage.	Deploy on a cloud platform with load balancing and auto-scaling support.
2	Data Storage	Local SQLite database.	Migrate to PostgreSQL or MySQL with cloud database services.
3	Performance	Single Flask application instance.	Implement caching, API optimization, asynchronous processing, and multiple application instances.
4	Security	Basic authentication and API key management.	Add OAuth authentication, HTTPS, role-based access control, encrypted data storage, and secure session management.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	AI-powered skill matching, enhanced recommendation engine, and professional networking event suggestions.	3–6 Months	Improved recommendation accuracy and user engagement.
Phase 3	Real-time messaging, connection requests, notifications, and profile verification.	6–9 Months	Better networking experience and increased platform interaction.
Phase 4	Mobile application, multilingual support, analytics dashboard, cloud deployment, and integration with professional networking platforms.	9–12 Months	Increased scalability, accessibility, and wider user adoption.
